Mary Bobeczko Chosen First V.P. of Ohio Fraternal

CANTON, O. — Mrs. Mary Bobeczko, UNA activist from Ohio, was elected first vice-president of Ohio Fraternal Congress at its 56th annual session held in Canton Monday and Tuesday, October 8-9.

Supreme Advisor Taras Szmajala, Supreme Advisor Bohdan Futey and Mrs. Bobeczko were the delegates registered to represent the Ukrainian National Association and Mr. Nicholas Bobeczko registered as a guest. Eighty-eight delegates represented 38 societies of paid-up membership of 63 societies. There were thirteen past presidents in attendance and they were honored at a luncheon Monday noon.

On Monday, Mrs. LaRue Hope, past president 1970-71 and member of the Catholic Ladies of Columbia, officially opened the congress in place of Walter Luecke, Lutheran Brotherhood, immediate past president, who was unable to attend. The national anthem was sung by the delegates and Mrs. Bobeczko led the delegates in the pledge of allegiance. Mrs. Hope presented the gavel to Mrs. Marguerite M. Behringer, National Catholic Order of Foresters and president of the Ohio Congress, to preside over the two-day session.

The invocation was delivered by Rev. Arthur M. Niet of St. Joseph's Catholic Church. The welcome address was made by the Hon. Stanley A. Cimch, Canton City Mayor. On the agenda for Monday morning were the reports of officers, greetings, appointment of committees, introduction of past presidents and guests. Mrs. Bobeczko was appointed chairman of the state of the order committee.

The Monday afternoon session was devoted to the 26th annual forum on the theme "Getting The Job Done: The Role of Fraternal Life Insurance from Home Office to the Field". The speakers were John W. Dressler, F.I.C. Loyal Christian Benefit Association; Leroy C. Backberg, F.I.C., Lutheran Brotherhood and Mike Rodin, member Knights of Columbus. The Forum Review was given by Harold E. Zeller, F.I.C., member Modern Woodmen of America.

"A LIVING, BLOSSOMING TREE"

(Continued from p. 2)

ethnic studies on a much broader front and also give more students an opportunity to study under them. We are now engaged in a research program in five of our metropolitan areas, studying the role that ancestral languages play in retaining a culture. We will be expanding this study to some of our smaller centres and rural areas, as well, and will announce them in the middle of December.

Other future projects include a study of the attitudes of majority groups toward minorities, and an examination of why some people today deliberately drop any identification with their cultural heritage. We are continuing and expanding our program of grants, which makes funds available to ethnic and cultural groups for projects that express their cultures here in Canada, and also supports the development of multicultural centres. The most recent grants under this program were announced by the Minister of State for Multiculturalism on October 3rd — 22 grants totalling more than \$79 thousand. We are also making grants to groups who want to develop textbooks and other teaching aids for ancestral languages for use in the public schools as well, in the provinces where ancestral languages are taught within the school system.

In closing, let me say just a few more words about languages. Languages have two functions. They are a means of communication and they are the vehicle of a culture. Governments can, of course, support languages in either or both of these roles. But in Canada, the term "official" is applied to languages only in their communications sense. An overwhelming number of Canadians use either French or English in their day-to-day communications with each other, and with their governments. And it is only for this very practical reason — not because of some rationalization about race — that these two languages have an official character in Canada. French and English are neither superior nor more precise than any other language. They are simply used more in Canada.

The other use of language, language as a vehicle of culture, is not recognized officially and does not need to be. Language in this sense is practically synonymous with culture, and in this sense it deserves the support of the government because its survival guarantees the cultural richness, diversity and strength of the country. Most of us are familiar with the term "the Canadian mosaic", a term we sometimes use in contrast to another term, "the American melting pot". But perhaps the word "mosaic" is an unfortunate choice to describe the reality of Canada. It suggests a number of bright pieces cemented into place for all time, something static and unchanging, something with the relationships of its parts firmly fixed. The reality of Canada is like a living tree — rooted firmly in the past, but growing in the present and branching out toward the future. The Canadian Ukrainian community represents one of the strongest, healthiest, and most dynamic branches of Canada's multicultural reality. This gathering is evidence of that and you all deserve our heartfelt congratulations.
